Hi Jeff,

Yes, we sampled last week, and just compiled the data yesterday (we had an office move over the last few days so it's been a little hectic). Data is attached. We are sampling again this week on selected wells and will keep you posted. Meanwhile, let's set up a meeting to discuss this and the DEQ data. We've received the Mactec Report and other information.

Also, please see attached email from Ben Mathews. Are you coordinating a meeting or is he? We would like to meet with you alone, prior to any meeting with you and DEQ.

Please call when you get a chance (note my **new** address and phone #). Thanks.

**Subject:** Re: Response to USEPA

Robert,

It was stated in the response letter that your company would be conducting methane monitoring last week. I am interested in those results as they will factor into how we proceed in the near future with the progress of activities at the site. I would appreciate a summary of your readings. Based on the data, we can set up a meeting time to discuss further monitoring and extending the study area should it be deemed needed.

Thank you -
